**PRESS RELEASE - FOR IMMEDIATE RELEASE****“ARBORTECH LAUNCHES AS170 BRICK & MORTAR SAW**

**Perth, WA** – Arbortech’s revolutionary Allsaw technology just keeps getting better, with the unveiling of their new AS170 Brick and Mortar Saw in Massachusetts this week.

Arbortech’s Sven Blinks, said ***“Our technical guys have spent months working on the new tool design and the end result is very impressive. The AS170’s inherent safety features still make it the best choice for safety and precision, but now with over 40% more power, this new tool will save tradies time and money.”***

With its unique ability to cut square, deep, and safe, the AS170 comes with innovative design features including a completely new, dust resistant motor. The only small, inherently safe, handheld brick and mortar saw on the market, the patented cutting action means virtually no fly dust, improved reliability, faster cutting speed, and durability in the toughest work environments.

Ideal for mortar and housing repairs, where dry, accurate cutting is a necessity, the AS170 will also be an invaluable tool for trade professionals including renovators, electricians and plumbers.

To see a demonstration video of this tool in action, or to view our online Electronic Media Kit visit:-

## ABOUT ARBORTECH

Arbortech is an Australian company engaged in the research, development and manufacturing of innovative technologies. Arbortech was incorporated in 1988 with the release of the Woodcarver™ Blade, a revolutionary product that allows the user to powerfully shape wood using free-hand techniques. Primarily known for its cutting technologies as featured in the Award-winning Allsaw technology, Arbortech also gained international recognition for its development of the Airboard™, a unique personal hovercraft that featured in the Sydney 2000 Olympics Opening Ceremony. Since its first product release, Arbortech has positioned itself in the marketplace as a progressive company delivering unique woodworking and masonry cutting power tools. Arbortech has gained an international reputation for an innovative approach, engineering excellence and cutting-edge technologies in already well-established industries.
